

*Dur-A-Flex® - Advanced flooring systems meeting industry requirements.*

# Fire Stations

**F**irehouse floors really take some heat. Cracked and peeling floors from the abuse of heavy equipment and hot tires are the norm. Daily application of oil absorbing materials create a ton of dust, and the disposal of

these absorbents is an obvious HazMat problem. Since companies have been turning to Dur-A-Flex® flooring systems, these concerns among others are easily solved. Up to 5 times stronger than concrete, our non-skid surfaces

not only provide a safe environment but resist deterioration and abrasion. And the low maintenance is a great value to fire fighters on the move.
